Hiring Manager
Pinterest

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Internship at Pinterest. I am currently a software engineering student at ENSEEIHT in the Software Systems specialty, driven by a passion for building useful, user-focused products. I'm excited about the opportunity to contribute to Pinterest's mission of bringing everyone the inspiration to create a life they love.

During my recent experience at the Institut de Recherche en Informatique de Toulouse (IRIT), I worked on classifying short messages in a distributed pair-programming environment. Through this project, I gained hands-on experience with state-of-the-art (I conducted a snowball literature review, starting from core papers and expanding through their bibliographies to identify further relevant work) and API integration, and I strengthened my skills in problem-solving, adaptation, and scientific reading and writing. This environment taught me to break down complex problems, iterate quickly, and collaborate across disciplines—skills I'm eager to bring to a product-focused engineering team.

I'm particularly excited about Pinterest because I've been an active user of the platform for years, and I deeply appreciate how it empowers people to explore creativity and discover ideas. Contributing to a product I genuinely value—one with high-impact engineering challenges and thoughtful, user-centered design—would be a meaningful opportunity for me.

I would be thrilled for the chance to grow as an engineer in a team that values creativity, curiosity, and technical excellence.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and interests align with Pinterest's needs.

Sincerely,
BOIREAU-DEVIER Chloé
